

Qatar - Doha

New international airport of Doha

Work description

Scheduled to open for passenger traffic in the second half of 2013, the New Doha International Airport will be one of the world's most advanced airports. The project includes fit out and completion of 17 passenger lounges including first class and business class. The total surface is 40,000 sqm. The project includes extensive architectural features, high-end finishes and complex coordination between multiple trades with aggressive completion schedule.
