Developing advanced and sustainable logistics centers

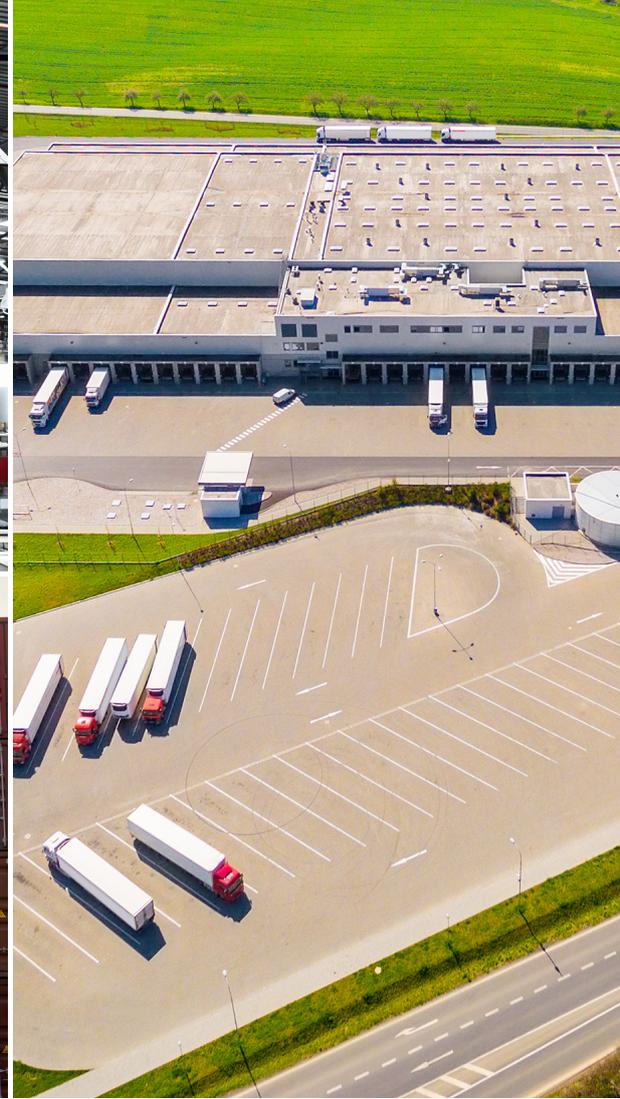

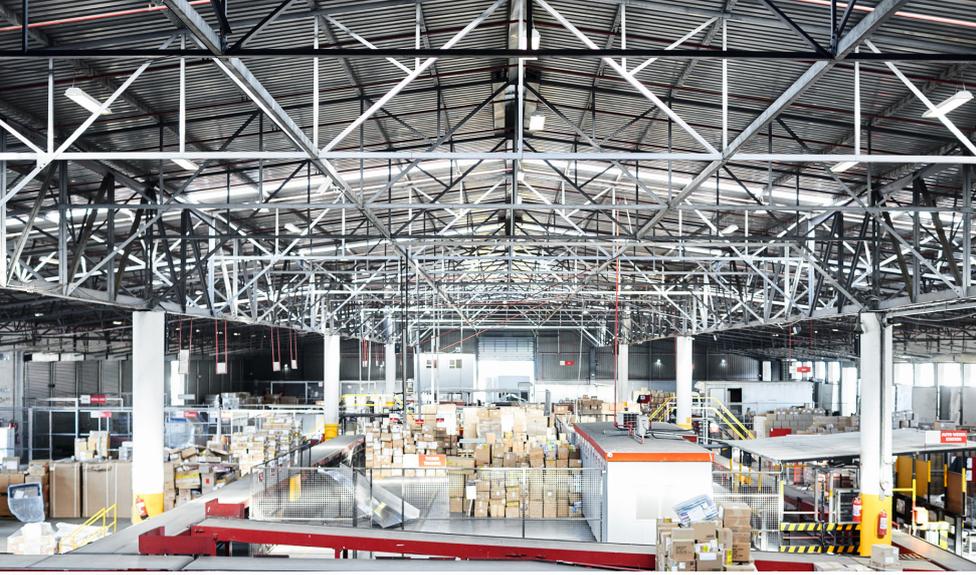

We provide a wide range of technical services for the realization of industrial and logistics projects, from preliminary studies to design development, project management, construction management, until hand-over and commissioning.

Logistics sector is facing a challenging time in which new technologies, new customers' expectations, new markets and new business models require the capability to be flexible and able to innovate constantly.

In the digital age of e-commerce, consumers can choose in an almost infinite market and request a great variety of goods, flexible solutions and fast deliveries with low costs.

This demands that warehouses be built in strategic areas, well connected with a strong and efficient transport network. Also, they need to be developed near urban areas with an adequate pool of potential customers, designed and built with innovative solutions.

We support our clients in carrying out smart and successful solutions.

Thanks to our multidisciplinary skills, we strive to design and realize high-quality and positive working environment.

Our teams are able to provide the best solutions in terms of efficiency, mitigation of environmental impact, energy performance and sustainability.

CUSTOM-MADE SOLUTIONS TO FULFILL CUSTOMERS' NEEDS

- Built-to-suit
- Sortable fulfillment centers
- Sortation centers
- Traditional non sortable
- Cross docks
- Delivery station "Last mile"
- Urban development works
