Club Med Cefalu

Work description

Club Méditerranée has been present on the promontory of Santa Lucia in Cefalù for over sixty years with a bungalow holiday village, which has now come to the end of its working life. Club Med has commissioned a new, sustainable design from an Italian architect, for the project involves more than a simple overhaul of the existing buildings (for the most part straw huts). The ambitious plan is to upgrade the entire site to “5 Trident” status, with less accommodation but of luxury standard designed to attract a wealthier and more demanding clientele. The site is of outstanding natural beauty and in a great location near Cefalù, one of Sicily’s most beautiful historic towns. Over the years the settlement has grown with the addition and modification of the facilities, while new vegetation has been planted that is not always in keeping with the character of the place.
